

# Bowker's BOOK ANALYSIS SYSTEM

A collection development tool that enables qualitative analysis of your holdings without laborious, manual comparisons.

## How it works

Upload your entire collection, run an analysis subject by subject and analyse your collections against H.W. Wilson's Standard Catalogs ( you must also be a customer of WilsonWeb to do this) or Resources for College Libraries.

The initial look at your holdings against Resources for College Libraries gives you an overview of how your collection compares to the top 58 subjects covered by RCL. You can quickly identify the areas in your collection that have the highest match of recommended titles.

Look more closely at your collection by drilling down to analyse the sub-classifications. This overview allows you to effortlessly identify the subject areas of your collection you might consider enhancing.

Click to access detailed information about the books selected for that subject. View price, binding information, audience level, printing status, and if the title has won an award or been reviewed.

Click on a title for a direct link to the full detail screen within BooksInPrint.com or GlobalBooksInPrint.com. Here you can read the review, synopsis, search online bookstores for competitive prices or check stock availability from popular vendors.

Bowker's Book Analysis System electronically compares your collection to the H.W. Wilson Standard Catalogs or Resources for College Libraries and provides you with reports that you can use to identify gaps and duplicates within your collection. Use this tool to:

- Spend more time focusing on selection decisions and create a custom core collection with confidence
- Maintain your collection on an ongoing basis so you can provide the most current and appropriate titles to your library users
- Analyse your collections by subject in an efficient, cost-effective, time-saving manner, reducing human error.

RCL Classification	Core Titles in Library	Core Titles NOT in Library	Total # of Core Titles	% of Core Titles Held
Grand Totals:	30,368	27,785	58,153	52.22%
